

PRESS RELEASE

## Geomod joins the Coexya group

**Lyon, 30 November 2021, Geomod – a software developer and provider of land and marine geomatics and hydraulic modelling solutions – has joined the Coexya group, an independent company and a leader in the IT/digital and software industries. The transaction will be a strategic merger between the two companies, that aim to increase their influence in the geomatics sector.**

The merger will enable the Coexya group to strengthen our position in the Geographic Information System (GIS) market and help us to grow in France and around the world.

Having changed our name from Sword France to Coexya in September 2021, we are pursuing the growth strategy that we launched a year ago. This initial acquisition is a significant first step.

Founded in 1995, Geomod is a **renowned software developer** in the geomatics field. The company works with clients in France and around the world, providing innovative solutions in three key areas:

- 🕒 Land geomatics, particularly urban noise mapping and electromagnetic radiation mapping.
- 🕒 Marine geomatics, particularly providing services and developing software for port services and helmsmen, as well as producing marine maps and standardised bathymetric charts.
- 🕒 Water management, particularly distributing and integrating mapping solutions.

Coexya is a **specialist across multiple fields**. We have been operating in the GIS field for over 20 years and are recognised as one of the leading companies in France in this field. We work closely with cities and local authorities. We help them to understand the challenges facing their areas, such as how to optimise transport systems, network asset management, smart cities and facility management.

We are experts when it comes to understanding our clients' businesses and supporting their digital transformation with tailor-made solutions for operational and decision-making processes.

*"This merger means we can increase the development and distribution of our products in France and internationally, and continue to fulfil our commitments to our clients, partners and employees," says **Claude Yvon, managing director of Geomod.***

*"We are delighted and so proud to be acquiring Geomod. Geographic Information Systems has been Geomod's area of excellence for many years. There are significant synergies between the*

two companies, be it in terms of moral values, business and technical areas of expertise or with respect to our presence in France," adds **Philippe Le Calvé, CEO of the Coexya group.**

---

### **About Geomod**

For over 25 years, Geomod has been developing, distributing and integrating advanced mapping and scientific software. Geomod works in the marine geomatics field, providing production and management solutions for hydrographic and oceanographic services, and it also works in the land geomatics field, providing applications that help to manage water, noise and electromagnetic radiation.

Geomod employs around 20 people at its offices in Lyon and Brest, and it generated a turnover of €3 million in 2021.

### **About Coexya**

Coexya is a digital services company with over 20 years of experience in providing software consultancy services, and integrating and developing software. On 1 October 2020, Coexya changed shareholders and with the support of its executives, operational managers and the European investment fund Argos Wityu, became independent of the Sword Group. Coexya's mission is to support organisations by developing solutions that address the new ways employees and clients use data. Coexya has six key areas of expertise: customer experience, content & modern workplace, health, legal, location intelligence and smart data.

Coexya currently provides services to around 370 clients. In 2020, the company achieved an annual turnover of over €61.5 million. Coexya currently has around 680 employees based at its offices in Lyon, Paris and Rennes.
