PRESS RELEASE

Coexya launches its solution Le Cloud by Coexya

Lyon, March 15, 2022 - Coexya innovates with its 100% French sovereign offer, Le Cloud by Coexya. An important factor of agility for organizations, Le Cloud by Coexya provides global support for IT projects, from the design to the operation of solutions.

Today, public organisations and more and more private companies want to adopt the Cloud, but remain wary of the use and storage of sensitive data processed daily. This data must remain on French territory, free from any foreign interference. The need to accompany organisations in this process requires know-how to define solid and global commitments in the Cloud strategy.

Moreover, the digitalisation of an Information System is not only a technical migration, it also means unifying the organisation's processes by taking into account numerous issues such as data sovereignty, innovation capacity and scalability.

LE CLOUD
by COEXYA

To meet these challenges, Le Cloud by Coexya offers :

- **A tailor-made, turnkey model** to ensure an end-to-end service: implementation, maintenance and operation;
- A single point of contact for our customers;
- 24/7 response to meet availability requirements;
- Production and pre-production platforms hosted in sovereign data centres: Strasbourg, Lyon and Paris;
- ISO27001 certification as well as HDS certification (Health Data Hosting Company) which guarantees the protection of sensitive data;
- A SecNumCloud qualification process is underway;
- A reduction in the carbon footprint **through a committed approach to GreenIT.**

Christophe Adet, IT Manager at Amarenco France, says *"With Le Cloud by Coexya, we were able to deploy our first Nuxeo document service in less than 2 months and benefit from the ECM expertise of a recognized consulting integrator."*

Coexya has already proposed Le Cloud by Coexya to meet the challenges of **Amarenco**, an independent producer of photovoltaic energy. In the context of its strong growth, **Amarenco** Group was looking for agility to deploy content services and wanted a rapid deployment; 2 months between the launch of the project and the deployment in production of the first business case. **Le Cloud by Coexya** allowed the implementation of a sovereign cloud, accessible to all entities in the world (France and Asia). These content services are interoperable with Amarenco's IT system applications (ERP, HR, CRM, etc.).

About Coexya

Coexya Group is a digital transformation specialist with over 20 years of experience in Consulting, Integration and Software Publishing. On October 1st 2020, Coexya Group changed its shareholder and became independent from Sword Group, relying on its management team, its operational management and the European investment fund Argos Wityu. Coexya's mission is to support organisations through the development of solutions that respond to new uses for their employees and customers. Coexya operates in 6 areas of expertise: Customer Experience, Digital Content, Health, Legal, Location intelligence and Smart data.

The **Coexya** Group serves more than 370 customers and in 2021 had a turnover of 67.8 million euros. The **Coexya** Group currently employs more than 701 people based in Brest, Lyon, Paris, and Rennes.
